EDUCATION

Nanyang Technological University, Singapore	Aug 2023 – Present
Bachelor of Business (Specialisation in Business Analytics), Bachelor of Engineering (Computer Engineering)	
- Current CGPA: 4.57/5.00 (Business), 4.52/5.00 (Computer Engineering) - Estimated Graduation: May 2027	
Hwa Chong Institution – GCE A-Level	2021 - 2022
Completed MOE H3 Chemistry Programme	

WORK EXPERIENCE

Business Intern POWER SYSTEM ENGINEERS PTE. LTD.	May 2024 – Jul 2024
Worked closely with supervisor and other departmental teams to analyse and improve business operations, identifying areas for optimisation and facilitating communication to ensure seamless coordination	
Software Engineering Intern FPT Software	Jul 2025 – Sep 2025
- Built an NLP-powered analytics dashboard translating natural language queries into SQL to generate dynamic data visualisations - Implemented frontend logic to convert chatbot outputs into interactive charts for real-time data exploration - Improved query accuracy through prompt engineering and designed schema to support flexible analytics queries Tech: FastAPI, PostgreSQL, React, Docker	
MVP Developer	Jul 2025 – Sep 2025
- Developed a gamified fitness application with AI-generated and personalised workout plans based on user data - Built full-stack workout tracking system enabling detailed monitoring of sets and repetitions - Integrated AI-generated outputs to deliver personalised workout recommendations Tech: React Native, Supabase (PostgreSQL)	
Software Developer That Remote Company	Aug 2025 – Oct 2025
- Built an AI-powered food and wellness application integrating a smart weighing scale to automate real-time health data collection - Implemented Android hardware integration using Kotlin and device SDKs within a React Native application - Developed food logging with image recognition to estimate nutritional intake and generate user health insights Tech: FastAPI, Supabase (PostgreSQL), React Native, Kotlin	

PROJECTS & HACKATHONS

The American Express Innovation Labs AI Hackathon	Feb 2023
Collaborated with a team to develop a predictive analytics tool using Python	
NUS – Guru Network AI Innovation Challenge	Feb 2025
- Built a healthcare application with a generative AI chatbot providing personalised consultation based on user medical data - Integrated structured user inputs (appointments, conditions, medications) into AI-driven responses	

SKILLS

Languages: Proficient in English and Mandarin
Programming Languages: C, C++, Java, Python, R, SQL, Typescript
Frameworks & Libraries: Django, Next.js, React, React Native, Spring Boot, Vite
Databases: MongoDB, PostgreSQL, Supabase
Technologies & Tools: Docker, Tableau

CO-CURRICULAR ACTIVITIES

NBS Accounting and Assurance Team	Aug 2024 – Aug 2025
Deputy Logistics Director	
Assisted in planning and coordination of logistics for events and conducted audits for various clubs, reviewing their financial records	
Hall 6 Table Tennis Captain	Aug 2024 – Aug 2025

- Organised and conducted regular training sessions, and led the team to participate in inter-hall tournaments
- Coordinated with hall committee for scheduling and booking of venues to ensure smooth operation in events

Students' Computer Science & Engineering Club

Oct 2023 – Sep 2024

Publicity & Publications Sub-Committee

- Contributed to the design of event collaterals and creation of media for the platforms that the sub-committee manages (Instagram, LinkedIn, Facebook, Telegram Channel, SCSE Club email)

AWARDS & HONOURS

Edusave Scholarship	2020
• Awarded to students within the top 10% of their school in terms of academic performance	
Hwa Chong Diploma	2023
• Awarded to students with exemplary holistic and academic results	
Colours Award	2022
• Awarded to students for their sporting achievements and display of good sporting character	

VOLUNTEER EXPERIENCE

AIC Silver Generation Ambassador	Jan 2023 – Dec 2023
• Visited seniors regularly to check up on them and to explain relevant government policies to them	
HCI Mathematics Clinic	Jun 2022 – Aug 2022
• Tutored other students in Mathematics	

SIDE PROJECTS

Expense Tracker App
• Developed a full-stack expense tracking application inspired by Cashew Expense Budget Tracker, enabling categorisation and filtering of financial data • Designed backend APIs and database schema using Spring Boot and PostgreSQL
